We want to hear from YOU!

We are looking for parents or caregivers of children with autism to participate in a focus group to discuss their experiences with Augmentative and Alternative Communication (AAC).

If you have a child with autism who has used any form of AAC in the last 2 years, we’d love to talk to you! AAC includes the Picture Exchange Communication System (PECS), communication boards, communication apps, DynaVox, BIGmack Switch, and others.

For more information or to participate, please contact Kristi Morin at klmorin@tamu.edu or 979-436-3788
